

PROCESS DESCRIPTION PROGRAMS

Sukhbir Tatla

sukhbir.tatla@senecacollege.ca

PROCESS DESCRIPTION #1

- The discount policy depends on whether a customer is a new or repeat customer, the store also give a seniors' discount: New customers get a 20% discount on their second order whereas, repeat customers get free shipping. Customers 65 and over get a 10% discount on their current purchase. Customer is eligible to avail only one discount. Write a program to calculate the total cost of an item after applying the eligible discount.

PROCESS DESCRIPTION #2

- Create a C++ program for the following process in an office email system:
- Send an email if recipient address is present, subject is present and time is before 5:30pm.
- If time is after 5:30pm then put email in a pending folder.
- If Recipient address is missing or subject is missing, then display warning message and don't send the email.

THANK YOU!
